PROFILE

IT Support Specialist with 3+ years of experience providing technical support, incident resolution, IT operations, and customer-facing support in fast-paced environments. Skilled in Microsoft 365, Azure Active Directory, Active Directory, Windows administration, hardware and software troubleshooting, networking, endpoint management, and IT asset management. Experienced in developing internal IT solutions and AI-powered workflow automations to improve efficiency and reduce manual processes.

EXPERIENCE

ICT SERVICE OFFICER | BESOMI ELECTRONICS LLC
DUBAI, UAE | JULY 2023 – PRESENT

- Provide first-line IT support and troubleshoot hardware, software, Windows, networking, and user-related technical issues.
- Support Microsoft 365, Azure Active Directory, Active Directory, endpoint management, user access, and IT-related service requests.
- Manage IT assets, equipment, system records, and technical documentation to support reliable day-to-day IT operations.
- Develop and maintain an internal IT Ticketing System to centralize IT requests, improve issue tracking, and streamline service request management.
- Develop AI-powered workflow automations to reduce repetitive manual tasks and improve internal business processes.
- Developed an AI-powered quotation automation tool for the Procurement team to streamline quotation preparation and improve workflow efficiency.
- Provide website administration and support, including content updates and troubleshooting of customer-facing issues.
- Handle customer technical and website-related inquiries through phone, email, website, and ticketing systems.
- Coordinate with sales, procurement, logistics, finance, and external vendors to resolve technical and operational issues.
- Assist with system updates, process improvements, reporting, and workflow optimization.

ACHIEVEMENTS & PROJECTS

- AI-Powered Quotation Automation — Developed an AI-based automation solution for the Procurement team to streamline quotation preparation and reduce repetitive manual work.
- AI-Powered Order Follow-Up Automation — Developed an AI-powered automation to streamline customer order follow-ups, reduce repetitive manual communication, and improve order management efficiency.
- AI-Powered Order Tracking System — Developed an AI-assisted system to organize and monitor order information, improve visibility of order status, and streamline the tracking process.
